

CO2 FILLING MACHINE  
FULLY AUTOMATIC

## Description

TSS Co2FM carbon dioxide is used with water press. It is a kind of repairers to fill carbon dioxide extinguishing agent into various portable type of carbon dioxide fire extinguishers automatically or semi-automatic.

It consists of the thermostatic system, console, electric scale etc. And it has the advantages of safety and reliability convenient operation, Accurate filling volume, and high work efficiency. It is the ideal filling equipment for fire fighting equipment manufacturers and repairers.

Specification	Parameters			
	Mt2	Mt3	Mt5	Mt7
Weight of the extn agent kg	2	3	5	7
Filling time sec	<50	<60	<60	>90

## Primary technical specification

- \* Basic parameters of filling
- \* Range of application for high constant temperature: 38°C ~ 45°C, pressure 9 ~10 Mpa
- \* Range of application for low constant temperature : 2°C ~ 10°C, 7 MPA
- \* Environmental temperature : 5°C ~ 55°C
- \* Dimension of the console:  
650x x 550x 1100 mm
- \* Weight of the console: 39 kg
- \* Power Supply: 220 V
- \* Power : 3500 W
