

DRY POWDER FILLING MACHINE

Description

Dry power filling machine is compatible to fill portable and trolley type fire extinguishers. By adopting vacuum filling machine sucks dry powder into the powder holder quickly and fill it in the container. This machine is compact, movable, easy to operate and pollution free, it can recycle dry powder in the fire extinguisher directly, thus reducing labor intensity and improving working environment. This machine is particularly applicable to the filling of dry powder fire extinguisher, and is also applicable to the filling of various powder products.

Technical Details

Volume	800x500x1200 mm
Weight	85 kg
Voltage	220 v, 50 hz
Power	1.1 k/w
Filling speed	3 kg/ min
Filling diameter	20- 80 mm
Filling residual	1 kg< 0.05

Standard accessories

- * Foot board for reversing valve
- * Suction tube bracket
- * Descent brake crank
- * Rise handle
- * Suction tube
- * Powder holder window
- * Powder holder
- * Electrical cabinet
- * Front and back adjustable fixing bolts
- * Upper brackets
- * Feed opening valve switch
- * Reversing valve
- * Electrical airpumb
- * Rise and fall spring fixed pin
- * Base of the wholemachine
